

MAHALAXMI A GOUDA

+91 8660125156 | mahalaxmigouda2004@gmail.com

CAREER OBJECTIVE

A passionate Computer Science student eager to apply programming, problem-solving, and analytical skills in a dynamic organization while continuously learning new technologies and contributing to innovative and impactful software solutions.

SKILLS

Programming: Java

Database: MySQL

Core Concepts: Object-Oriented Programming (OOP)

PROJECTS

Library Management System | HTML, CSS, MySQL

- Engineered a web-based management system to automate core library operations, including book issuance, returns, and real-time inventory tracking.
- Improved record management efficiency and data accuracy by centralizing data handling and administration through MySQL.
- Delivered an intuitive user interface for both students and administrators to streamline daily academic operations.

AI Interpreter for Text, Speech & Sign Language | Python, HTML, CSS

- Developed multi-modal conversion modules for Text-to-Speech and Speech-to-Text to enhance digital communication accessibility.
- Designed innovative functionality for Text-to-Sign and Speech-to-Sign representation using real-time data processing.
- Applied structured programming principles to explore and implement real-time communication use cases for differently-abled individuals.

INTERNSHIP EXPERIENCE

Software Development Intern | Tap Academy

January 2026 – Present

- Collaborate within a professional development environment to strengthen coding practices and core programming fundamentals.
- Streamline software development workflows and improve system reliability through effective debugging and error resolution.

Full Stack Web Development Intern | Web Stack Academy

September 2025 – November 2025

- Developed "Homely Hub," a comprehensive room-booking platform, implementing advanced city and price-based filtering to optimize the tourist experience.
- Designed and integrated responsive UI components, ensuring seamless cross-device compatibility and a smooth booking flow.
- Implemented efficient search algorithms and filter functionalities, significantly improving site navigation and booking efficiency.
- Strengthened practical proficiency in full-stack development methodologies, systematic debugging, and cross-functional teamwork.

EDUCATION

Bachelor of Engineering in Computer Science

Anjuman Institute of Technology and Management, Bhatkal

Expected Graduation: 2026 | CGPA: 8.11
